Beyond the basket: An interview with the man behind the winning buzzer-beater

Mitchell's roommates welcome him home after his win. *Photo courtesy of Nicholas Chambers*

NICHOLAS CHAMBERS
Staff Writer

The University of Mary Washington men's basketball team won its first NCAA DIII National Championship on April 5, thanks to a final-second buzzer-beater by sophomore forward and business administration major Colin Mitchell to defeat Emory University 75-73.

The team arrived back on campus in front of the Anderson Center on April 7, welcomed by a crowd of students, faculty and staff who cheered them on. This was a long-awaited homecoming after bringing Mary Washington its first national title since 1991.

"Seeing him at the center of publicity and attention overnight has been one of the coolest experiences of my life. I just know how hard he has worked, and he truly deserves every ounce of praise he has received."

- Luke Smith

"It was really cool to see everybody out there when we got back home," said Owen Pottenburg, sophomore forward who played during the championship game. "The amount of support that everyone has shown throughout this long season means a lot, and it felt really good to bring home a national championship to the community."

Local news stations like Fox 5 were in attendance as well as plenty of cameras, but Mitchell frequently appeared at the center of the celebration, even lifting the NCAA trophy in front of the rejoicing crowd.

Mitchell's life has since changed, amassing thousands of views from the game's coverage on the NCAA social media pages, hundreds of followers on his personal Instagram and highlight appearances on SportsCenter, The Pat McAfee Show and news stations around Virginia.

"I love media, and I love doing stuff like this," said Mitchell after seven total interviews with press outlets in the week following his game-winning shot. "Being able to give back and shout out the people that have helped me along the way has been great."

"Seeing him at the center of publicity and attention overnight has been one of the coolest experiences of my life," said Luke Smith, a sophomore business major and roommate of Mitchell's. "I just know how hard he has worked, and he truly deserves every ounce of praise he has received."

Mitchell grew up in Chesterfield, where he played basketball for Cosby High School and the competitive Benedictine College Preparatory in Richmond. This is where UMW's Head Basketball Coach Marcus Kahn and Assistant Basketball Coach Mark Sansone first laid their eyes on his talent.

"They watched me in high school down in Richmond at Benedictine, and so when I was told to come up for a visit, I immediately wanted to," Mitchell said.

Mitchell committed to Mary Washington shortly after meeting the coaching staff in February 2024, achieving his lifelong dream of playing college basketball.

"Anytime going from high school to college is a difficult transition," he said. "Moving away from home, your family and friends that you have, adjusting to the speed and tempo of collegiate athletics. You really have to wait your turn."

Mitchell's turn came in the national championship game, where he logged a career high 27 minutes played, a large turnaround from the seven minutes he played in UMW's home opener against Guilford back in November 2025.

"I spent hours and hours this summer dedicating my time to getting better—in the weight room, on the court," he said. "And so when I got here as a sophomore, I was ready to take off."

The 2024-2025 Mary Washington Eagles watched their season come to an end last year at the hands of Emory University after a Cinderella run that yielded them a Sweet 16 appearance despite a .500 (15-15) record in the regular season.

"We had an amazing run last year, but we knew we meant business this year, so the second we got back on campus, we were ready to roll," Mitchell said.

The early exit didn't linger. Instead, it became the fuel that shaped their mindset from day one.

"Funny thing, we named our group chat 2026 Natty Champs at the start of the year, because we knew that this was where we wanted to be. We pushed ourselves through the entire year to get there," Mitchell said.

Mary Washington cruised through this regular season, going an astonishing 22-3 before sweeping Salisbury University and Christopher Newport University in the Coast to Coast Athletic Conference Tournament.

"It was an amazing feeling seeing all the fans and alumni there. Just to see the work that everyone and myself has put in and being able to share that and show how great of a program UMW is to everyone in the world, was amazing."

- Colin Mitchell

From there, the Round of 64, Round of 32 and Sweet 16 of the NCAA tournament ran through Fredericksburg, where the Eagles prevailed three times in front of their home crowd and student section.

They moved on to Fort Wayne, IN, where in the Elite 8, they took down the University of Chicago by eight points and the Final 4 game against Trinity University, which gave them their place in the national championship game on Easter Sunday.

With two minutes and 21 seconds to go in the National Championship, Mary Washington found themselves on the plus end of a 71-61 score sheet. Despite this lopsided score, Emory tied the game with 10 seconds to go.

"We didn't have any timeouts, and we knew we needed to get the ball down the floor," Mitchell said.

What happened next was for the record books.

"I was in the right place at the right time," Mitchell said. "We knew we needed to crash offensive rebounds. I had four rebounds the whole game, and I knew that Coach made an emphasis on it before the game. So I sat there, and I was ready to go."

As the clock hit zero, the Eagles became national champions.

"After it went in, I just blacked out and started running and celebrating with my team," said Mitchell.

The play not only sealed the victory but instantly became a defining moment for the program's championship run.

"It was an amazing feeling seeing all the fans and alumni there. Just to see the work that everyone and myself has put in and being able to share that and show how great of a program UMW is to everyone in the world, was amazing."

Mary Wash's hidden gem: the STARS Center

HORTENSIA NGANDU
Staff Writer

The Center for Student Transition, Access and Retention Services (STARS) in Lee Hall is one of the most underrated third places on campus. Everyone visits Lee, whether it be for classes, the bookstore or Academic Services, yet STARS remains a hidden gem.

A "third place" is a social place that encourages connection and community among those who frequent it, often separate from the "first place," home, and the "second place," work or school.

Many students rely on communal spots such as these to build friendships and foster a sense of belonging among their peers. This is especially true for commuters, who spend limited time on campus, and first-year or transfer students who want to put themselves out there but aren't sure where to start.

UMW offers several lounge spaces; however, many of these locations on campus are often underwhelming and fail to meet student needs. For example, while advertised during New Student Welcome, the Off-Campus Student Lounge doesn't really motivate students to stay or talk to new people.

"My favorite thing in the world is when I'm sitting at the front desk, and I hear everybody laughing and talking in the couch area, especially when it's different classes mingling with one another, because I think that's kind of what makes STARS a true family."

– Sarah Moon

Busy buildings like the Simpson Library or the Hurley Convergence Center are seen more as study spots, where students are focused on work, not socializing.

I've found that these places don't encourage amity or connection. Most people there keep to themselves, and the environment is quiet. There are also many dining options, such as Panera and Eagle's Nest, but they don't create areas where people stay for long.

Naturally, the STARS center stands out as a dedicated space to spend time with peers outside of a classroom setting.

Established in fall 2024, STARS was created to support historically underrepresented students attending UMW.

With the office came their Summer Transition Program (STP)—a free two-week experience for first-year students, created to support their transition to university life.

I participated in STP, and at the end of the program, we were encouraged to stay in touch with the advisors and the other students we met there by visiting the STARS center, with many of us doing so.

Freshman Damaris Olive is a commuter and a former STP student. She regularly spends time in the STARS Center and sees it as a valuable place for people who lack access to residential spaces, such as dorms.

"It's really comfortable. And there are people that I've already met through the STARS program," said Olive.

Although STARS is primarily advertised to STP attendees, it's an open environment in which all students are welcome.

Junior English major Sarah Moon was an STP counselor last summer and is Team Leader of the STARS Ambassadors, working as an ambassador since the fall of 2024 and is in charge of the study hall on Monday evenings.

Moon mentioned that people may shy away from the STARS Center, thinking that it's exclusive to students who participated in the STP program or strictly for underrepresented students.

"Something that I think the STARS center could improve on is getting people outside of the STARS center to see us and recognize us as a larger center, a larger program," said Moon.

Inside, students can find snacks, free printing, comfortable seating and most importantly, an atmosphere that encourages conversation and socialization.

Abbey Wasson, a freshman biology major, discovered the STARS Center during her second semester at UMW. Even though she is a residential student outside of STP, she appreciates the approach of the STARS lounge area.

"It felt like I was in my living room," said Wasson.

The space is often decorated to match the time of year. Colorful leaves in the fall, a holiday crafting layout with Christmas-themed paintings in the winter and flower cutouts in the spring all give the room the personality many campus lounges lack.

To further meet the needs of students, STARS has designated study hall hours on Monday and Tuesday evenings. The study hall is run by student ambassadors and gives students a quiet environment to focus and do their work.

"My favorite thing in the world is when I'm sitting at the front desk, and I hear everybody laughing and talking in the couch area, especially when it's different classes mingling with one another," Moon said. "I think that's kind of what makes STARS a true family."

Regular visitors enrich the community, and events are hosted throughout the semester. Whether it's a craft event, movie night or a holiday celebration, the events meet the interests of the students who use the space and further encourage socialization.

I've spent a lot of time in the STARS center, attending events, watching movies, studying or just hanging out with friends. As a commuter, it's one of my favorite places on campus and is somewhere I always look forward to going to.

Among the places on campus, STARS is the ideal third place. It's underutilized by a lot of students outside of STP who could greatly benefit from what it offers.

New exhibit spotlights untold stories of first Asian students

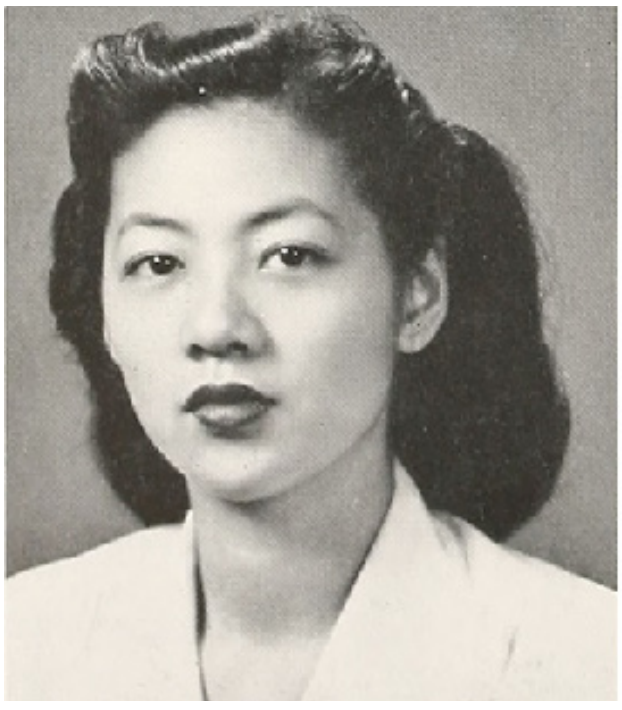

AYA OGAWA
Staff Writer

At a screen-printing demo on April 15 in Melchers Hall, students pressed ink through mesh screens onto tote bags. The transferred images featured two women who are deeply connected to Mary Washington's past.

They were Mary Wong and Meechi Yokogawa, two of three figures featured in "Stories of Firsts: Asian and Asian American Students at Mary Washington," as well as Marie "Bunny" King, at an upcoming exhibit at Simpson Library.

The student curator of the exhibition, MacKenzie Martin, a senior studio art major, worked on the project with Sarah Appleby, a university archivist at Simpson Library, and Kristen Moon, a UMW history and American studies professor.

"This kind of project was so different than anything I had done before. It was research-based and historical-based, and it was for something that was incredibly exciting to get involved in," Martin said.

Hidden within the archives is an untold story about UMW's first ever Asian students. *Photo courtesy of Sarah Appleby and MacKenzie Martin*

According to Appleby, Wong, who was born in Washington, D.C., enrolled at UMW—then Mary Washington College—in 1948 and graduated in 1952 with a bachelor's degree in chemistry. She graduated in three years and was involved in campus life, including serving as class treasurer and participating in theater.

"From my perspective, the exhibit stands out in how it foregrounds individual histories and lived experiences. By emphasizing personal memories and archival records, it avoids stereotyping and presents each woman's story with nuance," said Suzie Kim, associate professor of art history and adviser for the project.

Wong's story fills one full display case, while Yokogawa and King share another. Martin said Wong's case is fuller partly because the team had more material to work with, including an oral history interview conducted by Moon.

"A bulk of this project was kind of formulated around an hour-long interview that Dr. Moon had with Mary Wong," Martin said.

King, who immigrated from Shanghai and was at Mary Washington for a short period in the mid-to-late 1940s, represents the immigrant experience in the exhibit, with much of her story shaped by visa documents and immigration records.

MacKenzie Martin highlights the lives of students who marked UMW history. *Photo courtesy of Sarah Appleby and MacKenzie Martin*

Yokogawa, the first UMW student of Japanese ancestry, came from Tokyo and arrived in 1950 after being delayed by the Korean War. She was described in campus records as a strong student who joined several organizations before graduating in 1954.

"They are really the first students of color to attend Mary Washington, and they're part of this almost sort of glimmer of possibility right during World War II and into the early 1950s that there's something changing in the country, changing in Virginia, changing in Mary Washington, that potentially we will become more inclusive," said Moon.

The exhibit itself developed over time, through conversations with Moon and Appleby that started after Moon came across Wong's name while reviewing a 1950 census.

"We had been working to identify kind of the first Asian and Asian American students at Mary Washington, so that we could highlight them," Appleby said.

Martin's involvement in the exhibit occurred later, after approaching Appleby about working in the archives.

"[Martin] had expressed interest in doing an internship with the archives, and we thought that it would be really interesting to have somebody with an artistic background with a particular kind of approach to visual media to sort of interpret these stories and figure out a way to put together a really cool exhibit," Appleby said.

In addition to the core team, some students were invited to contribute feedback during the planning process.

Lily Mizoe, a senior psychology major, said she was drawn to the project because of its focus on underrepresented histories.

"I think that it is important to recognize the history of minorities on our campus. I didn't know anything about the history of Asian students at UMW, so I was very interested," Mizoe said.

Mizoe said her perspective was welcomed during the planning meetings, even as someone not directly involved in the research.

"My perspective and opinions were welcomed and taken into consideration. I was glad to be able to bring an outside view from the project," she said.

Mary Washington had originally been founded as a teaching college for white women and remained an all-white institution for many years, making these stories especially significant.

"It's always, I think, worth telling the story of people whose stories don't often get told, and in a predominantly white institution that's typically racial and ethnic minorities," said Appleby.

However, the exhibit also reflects two different stories about ethnic minorities: Wong's Asian American experience and the immigrant experiences of King and Yokogawa.

"There's really two stories that are being told here," said Appleby. "There's the Asian American experience, and then there's the immigrant experience."

The April 15 demo gave students a chance to engage with the project directly. Participants chose between two tote bag designs: one featuring Yokogawa and one featuring Wong standing in front of James Farmer Hall. For some students, the demo was also their first introduction to the exhibit.

This Simpson Library exhibit profiles the first ever minorities to attend UMW. *Photo courtesy of Sarah Apple and MacKenzie Martin*

Participants responded to the demo in different ways, depending on their familiarity with the exhibit and printmaking.

"I hadn't even heard of the exhibit before this, so now I definitely want to go see it," said Clarissa Igl, a junior philosophy and pre-law major.

Others were drawn in by the artistic process itself.

Stella Lemmond, a sophomore studio art major, attended because she already had some printmaking experience and wanted to see screen printing "on the big, professional level."

"I think it's relevant not only for the sake of being aware of our campus' history, but I feel, as an Asian-American woman, that I owe something to these women who paved the way for me to be here at UMW," said Madamba.

"It was wonderful to see students enthusiastic about the printing process as well as the subject matter, so it reinforced for me that we're showcasing a topic that people genuinely want to know more about," said Appleby while reflecting on the demo.

The exhibit reception and print unveiling will take place on April 24 at 2 p.m. on the third floor of the Hurley Convergence Center. The exhibit itself will be displayed on the second floor of Simpson Library and will remain up through the fall semester.

Photo Essay: Ayers reflects on a year of wildlife shots

While perhaps not the most striking caterpillar on its own, these moths-to-be group up to build their distinctive "tents" all over our local woods. Many of their constructions can be found along the canal path, and there's even a few campus. *Violet Ayers / The Weekly Ringer*

Great blue herons are some of the largest birds in the Fredericksburg area, and it's very cool to see them in person. If you went down to the canal in February, there was a good chance you would see this particular heron. Despite a missing toe, this heron was thriving off of the fish in the stocked pond which it frequented, joining the host of Fredericksburg locals who fish recreationally there. *Violet Ayers / The Weekly Ringer*

VIOLET AYERS
Photo Editor

Many mornings this semester I would wake up before sunrise and head out with my camera and binoculars to try and find the wildlife of Fredericksburg. I would often end up walking upwards of seven miles around Fredericksburg's trails with a six pound camera at my side, trying to make it back just in time for my 11 a.m. class.

Fredericksburg has a lot of great access to wildlife. The Rappahannock is full of osprey, eagles and herons, and you can even find a lot of wildlife on campus with how many wooded areas there are. As my time at UMW comes to a close, I wanted to look back at some of the highlights from my photographic endeavors this semester.

While not technically wildlife, goats aren't something you see every day on most college campuses. Often, the goats were placed near to where I was searching for birds, and provided welcome company in my early morning birding sessions. *The Weekly Ringer / Violet Ayers*

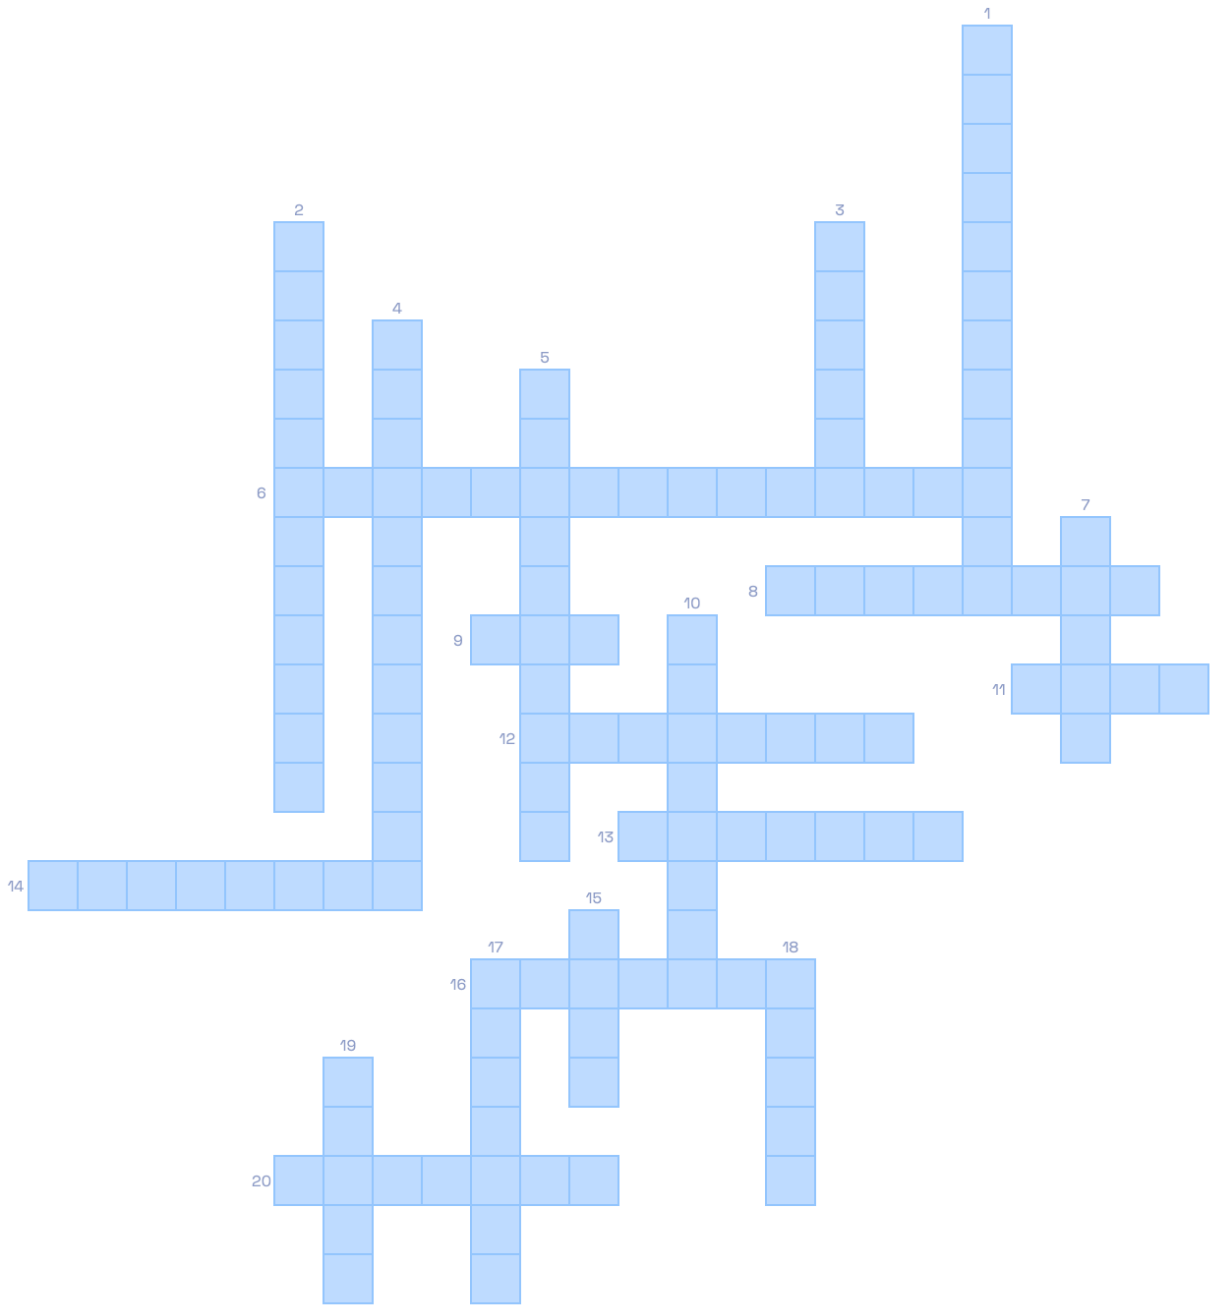

I was leaving my dorm to go photograph an event when I saw two people stopped outside. I looked over and saw these two raccoons lurking in a storm drain. I don't see raccoons often, so it makes my day whenever I run across one. *Violet Ayers / The Weekly Ringer*

I took this photo when I took a trip down to the river hoping to find some rare ducks. Instead, I was greeted by a veritable gaggle hanging out on the river. *Violet Ayers / The Weekly Ringer*

UMW eliminates in-person textbook purchasing option

ANNA GOODMAN
Sports Editor

The University of Mary Washington will no longer use Barnes & Noble as their bookstore contractor; instead, the university has accepted a proposal from A Book Company, LLC, which operates entirely online. This decision comes after UMW sent out a request for proposal for campus store operations on Feb. 7, 2025.

"With UMW's Barnes & Noble contract ending in June of 2026, the decision was made to issue a request for proposals (RFP) for campus retail operations," said Kathy Sandor, director of business services.

According to a Notice of Contract Renewal, from Nov. 22, 2024, between UMW and Barnes & Noble for bookstore and retail operations, UMW had three one-year renewal options remaining after the contract ends in June.

"When measured against the requirements of the RFP, the A Book Company, LLC dba [does business as] eCampus.com proposal scored the highest of the eight that were submitted. That is, the proposal best met the needs of the University," said Sandor.

The current bookstore will close for renovations from May 10 to May 26 and will re-open as a spirit shop and store for UMW merchandise, according to an EagleEye announcement posted on March 11.

"Details of a renovation are to be determined, but there will be noticeable changes when eCampus opens the doors," said Sandor.

Students, faculty and staff have the opportunity to recommend merchandise that they would like to see in the store to the store manager, who can be reached by calling the bookstore during operating hours. The current bookstore manager, Brett McMichael, will not continue in his role once A Book Company LLC assumes operations, as he will be moving into another position within the new company. McMichael's replacement has not been announced as of publication.

Although there will be a managerial change, current staff members will be provided priority consideration when it comes to staffing the on-campus store.

"Current staff have been given the opportunity to remain employed at the bookstore under A Book Company LLC should they choose," said McMichael.

A Book Company, LLC, will begin operations on May 27. The new bookstore will function entirely online, and students can purchase textbooks and course material through the website.

There will be a kiosk located within the new campus store where students can order course material.

"My main concern with the new online bookstore is getting my books in a timely manner before classes start, and I will miss being able to easily walk into the bookstore and get my books for classes," said Julia Mann, a sophomore elementary education major.

According to Sandor, A Book Company LLC has two options for shipping, and students can either ship their course materials to the on-campus store or they can ship their materials to their home.

Avery Kelly, a sophomore elementary education major, also expressed concerns that with the new bookstore being fully online, students may run into issues with receiving their class materials.

"I feel a lot of people, especially me, will wait to the last minute to get their stuff, and professors like to wait to the last minute to add a random book into your curriculum, and if you need it, it is going to be hard to get it on time," said Kelly.

If a student ships their course materials to the store, they will receive free two-day shipping on all orders shipped and sold by eCampus year-round, excluding marketplace and oversized items.

If a student ships their course materials to their home, they will receive free standard shipping on all orders over $59 shipped and sold by eCampus year-round, excluding marketplace and oversized items.

"eCampus offers textbooks in multiple formats including physical, digital, inclusive access, [open educational resources] and course packs," said Sandor.

A Book Company LLC also offers rental textbooks, and once the student no longer needs the textbook, they can return it by using the free UPS return label service available on the eCampus website.

General class supplies, such as pens, pencils and paper, will still be sold at the on-campus store with the exception of required class materials, such as lab coats and goggles, which will be found on the online store. Students have expressed frustrations with the current pricing of textbooks and course materials, and wonder how they might change with the ownership.

"Being a new educator in the system, I'm very intrigued on looking at the prices of books, because it is very apparent in classrooms and kids and students everyday lives that it can cause a burden," said Kelly.

A Book Company LLC will price-match textbooks within seven days of students purchasing them from the online store if the student submits a request.

According to their website, stores that they will price match against include Amazon, Chegg, B&N, TextbookX and local brick and mortar competitors. The item must be listed on the online bookstore for enrolled courses and be in stock at the time of purchase. There is a limit of one price match per title per customer during the seven-day window.

A Book Company LLC will not price match peer-to-peer marketplace purchases, publisher-specific rental programs, items delivered electronically to the digital bookshelf, Amazon warehouse deals, digital materials or out-of-stock items.

"Students can look forward to a broad merchandise selection with price points for multiple budgets," said Sandor.

The campus bookstore is changing ownership from Barnes and Noble to A Book Company LLC. Renovations are scheduled to start on May 10 and end on May 26.

UMW men's tennis serves up a win against NC Wesleyan University

ANNA GOODMAN
Sports Editor

The UMW men's tennis team defeated North Carolina Wesleyan University 5-2 at home Tuesday afternoon, improving to 18-5 on the season.

The Eagles started strong by dominating in the doubles, winning all three matches, which set the overall match score to 1-0.

After fighting hard, junior biomedical sciences major Evan Fisher and junior business administration major Jack Riordan won their double 7-5. Going down to match point, the duo came back in a tiebreaker.

"Last couple years, we've been telling ourselves we can do it, but maybe not actually believing it 100% but now all the guys are all in committed and we believe we can go, go far and win a lot."

– Trevor Rein

"Coming back down, a break in doubles to trudge on, we were down match point, and then we ended up winning it, turning around, just pretty fun," said Fisher.

The other two doubles teams won their matches with commanding performances. Trevor Rein, a junior economics major and Asher Willenborg, a junior finance major, won 6-1. Rein said the key to winning is keeping up a good energy and positive attitude.

"A lot of good energy, [Willenborg] is very positive, he's great and always upbeat and always having belief that we can win," said Rein about his doubles partner.

Freshmen Ryan Battaglia and Ryan Ginper won their match 6-1.

Jack Riordan winds up to hit the ball in his singles match. *Anna Goodman / The Weekly Ringer*

UMW men's tennis doubles partners Evan Fisher and Jack Riordan deliberating before their next play. The dynamic duo won their match with a score of 7-5. *Anna Goodman / The Weekly Ringer*

The good energy and winning mentality carried the Eagles through in the single matches to secure the victory, winning four out of the six matches.

Willenborg won in straight sets, only dropping one game, with a score of 6-1 in the first set and 6-0 in the second to secure his point for the Eagles.

"I would say we've just gotten a little bit tougher overall. We've just been out there grinding every single day, just working on our craft, and I think it's just finally starting to pay off."

– Evan Fisher

Rein followed suit, winning in straight sets, with scores of 6-4 and 6-2. Battaglia battled through three sets to secure a win after dropping the first, with scores of 2-6, 6-2 and 6-4.

Sealing the team's victory, freshman Cooper Lehman won his singles match with scores of 6-4 and 6-2.

The team's win at home marked another strong performance for the Eagles as they close in on the end of the regular season.

Fisher reflected on this past season with his teammates and said that they have put in hours of hard work that led to success on the court.

"I would say we've just gotten a little bit tougher overall," Fisher said. "We've just been out there grinding every single day, just working on our craft, and I think it's just finally starting to pay off."

After a devastating loss against Trinity University on April 17 with an overall score of 0-7, the Eagles were determined to get back on their winning streak.

"I mean, we had a tough one last week, but the boys bounced back very well today, and so we're right back on the right path," said Fisher.

However, the fight is not over yet. The team has hopes of advancing in the Coast to Coast Athletic conference tournament and the NCAA tournament.

"It's gonna be big, lost in the final last year against CNU, so try to go back out and win it this year, and then on to the NCAA tournament," said Rein.

The Eagles' next match will be on April 29 against No. 7 Johns Hopkins University at home; this game was rescheduled from March 27.

"Last couple years, we've been telling ourselves we can do it, but maybe not actually believing it 100%, but now all the guys are all in committed, and we believe we can go far and win a lot," said Rein.

The UMW men's tennis team improves to a score of 18-5 on the season. *Anna Goodman / The Weekly Ringer*
